Colour Seal™

PIGMENTED SEALERS FOR CONCRETE AND OVERLAY

PRODUCT INFORMATION

Colour Seal pigmented sealers are available in more than 1,200 standard colors, making it easy to match or improve the look of your property. The high-hide formula helps cover stains, discoloration, and uneven concrete while creating a smooth, durable finish. Colour Seal is available in both solvent-based and low-VOC water-based options, allowing your contractor to choose the right system for your project.

UV-stable, alkali-resistant pigments help the color stay attractive through sunlight, weather, and everyday use. D-Grip™ traction additives can also be added where extra slip resistance is needed. Use Colour Seal to protect and refresh pool decks, driveways, walkways, patios, porches, balconies, and other residential or commercial concrete surfaces exposed to stains and regular wear.

TYPICAL USE

- ☑ Residential and Commercial Concrete
- ☑ Stained or Discolored Concrete
- ☑ Decorative Concrete Overlays
- ☑ New Concrete and Existing Concrete Re-Sealing
- ☑ Walls and Other Vertical Concrete Surfaces

PRODUCT BENEFITS

- ☑ Countless Color Options
- ☑ Superior Stain Resistance
- ☑ Long-Lasting, UV-Stable Acrylic Protection
- ☑ Water-Based and Solvent-Based Formulas
- ☑ Helps Protect Against Salt and Ice Damage

PIGMENTED SEALERS FOR CONCRETE AND OVERLAY

POOL DECKS

Colour Seal is an excellent choice for pool decks that become uncomfortably hot. Lighter, more reflective colors help reduce surface heat while sealing and protecting bare concrete or decorative overlays. D-Grip™ can also be added to improve traction and create a safer, more slip-resistant surface.

DRIVEWAYS

Driveways and other concrete surfaces can become stained, faded, and discolored over time. When used with the proper cleaners, Colour Seal can refresh the surface and greatly improve the appearance and first impression of your home. Choose from more than 1,200 decorative colors to complement your property.

COMMERCIAL

Commercial concrete is often stained and discolored by heavy traffic, spills, and daily use. Because concrete is porous, it can absorb dirt and other contaminants. Colour Seal helps block stains from soaking in while adding durable color that can be selected to complement the surrounding building and property.
